Nevada Statewide & Metro Area Labor Market Overview

December 2021

Published on January 21, 2022

Employment in Nevada continued to grow in December 2021, adding 3,700 jobs over the month. This pace is a significant improvement to the 2,600 jobs added last month, with the Nevada Economy continuing to show ongoing recovery from the COVID recession. The largest drop from prerecession employment remains concentrated in the accommodation and food services industry, which remains down over 65,000 jobs compared to its peak of 322,500 jobs in that industry in February 2019.

At the same time, several industries are at or above their pre-recession employment peaks. Transportation, warehousing, and utilities is at 89,300 jobs, more than 12 percent above its 2019 peak with other industries including professional and business services, retail trade, and finance and insurance all employing more people than before the recession.

The unemployment rate in Nevada fell over the month, declining by 0.5 percentage points, the largest such decline this year, bringing the state rate to 6.4 percent on a seasonally adjusted basis. The un-adjusted rate fell as well, declining from 5.4 percent to 5.2 percent. The un-adjusted rate has been significantly lower than the seasonally adjusted rate for the last several months.

Two of the state's metropolitan statistical areas (MSA) experienced growth in December. The Las Vegas MSA added 6,100 jobs, growing at 0.6 percent. The Reno MSA added 1,100 jobs or 0.4 percent while the Carson City area had no new jobs added during the month.

The state's unemployment rate dropped to 6.4 percent this month down from 6.9 percent the previous month. This is likely to remain one of the highest unemployment rates in the nation and is reflective of the long road left to a complete recovery. However, this rate is down considerably from 8.2 percent in December 2020.

Although Nevada continues to see improvement in the labor market, there are still significant hurdles in achieving a full recovery in the state, especially the uncertainty around new COVID-19 variants and their potential impacts on businesses and the labor force.

Information on how to file an unemployment insurance or pandemic unemployment assistance claim, where to get updates from DETR, or what other services are available from the department can be found at the end of this write-up. Additional labor market information can be found on our website (<http://nevadaworkforce.com/>).

December 2021 Seasonally Adjusted Employment Summary (in thousands)

Area	Current Month	Previous Month	Monthly Change	M/M Growth	Previous Year	Annual Change	Y/Y Growth

Current Employment Statistics ([CES](#))

Estimates for this section come from the Current Employment Statistics (CES) program sponsored by the Bureau of Labor Statistics ([BLS](#)). Total nonfarm employment increased by 3,700 jobs from November to December, a growth rate of 0.3 percent. Since December 2020, total nonfarm employment increased by 94,700 jobs, or 7.4 percent. The largest employment increases in December, occurred in leisure and hospitality and retail trade. For more state employment information, please visit our [Nevada Area Profile](#).

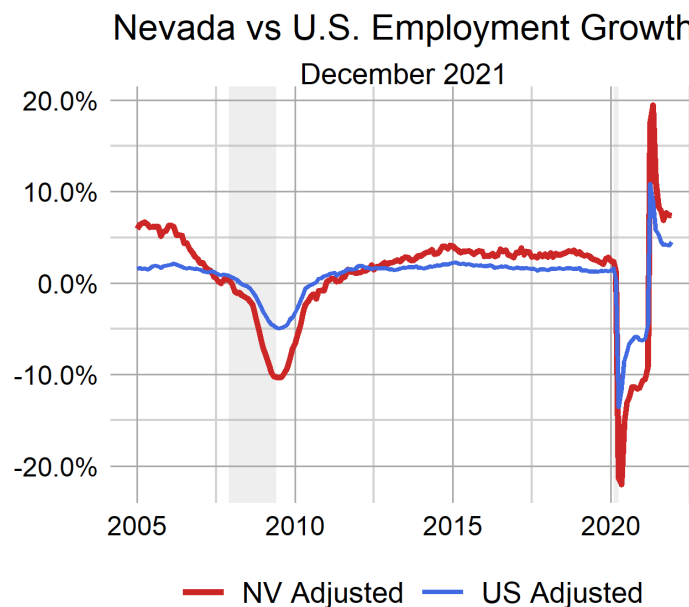

Las Vegas MSA seasonally adjusted total nonfarm employment realized an increase of 6,100 jobs (0.6 percent) from November to December. Compared to December 2020, total nonfarm employment saw an increase of 78,700 jobs (8.7 percent). Sector estimates are not adjusted for seasonality. To see more employment information, please visit our [Las Vegas Area Profile](#).

Reno MSA seasonally adjusted total nonfarm employment realized an increase of 1,100 jobs (0.4 percent) from November to December. Compared to December 2020, total nonfarm employment saw an increase of 9,700 jobs (4.0 percent). Sector estimates are not adjusted for seasonality. For additional employment information, please visit our [Reno Area Profile](#).

Carson City MSA seasonally adjusted total nonfarm employment had no increase from November to December. However, compared to December 2020, total nonfarm employment saw an increase of 1,400 jobs (4.7 percent). Sector estimates are not adjusted for seasonality. For more employment information, please visit our [Carson City Area Profile](#).

For more information visit our [CES Page](#), see the summary tables at the end of the document, or check out our dashboards for a [CES summary](#) or [industry estimates](#) or all the [Area Profiles](#).

Local Area Unemployment Statistics ([LAUS](#))

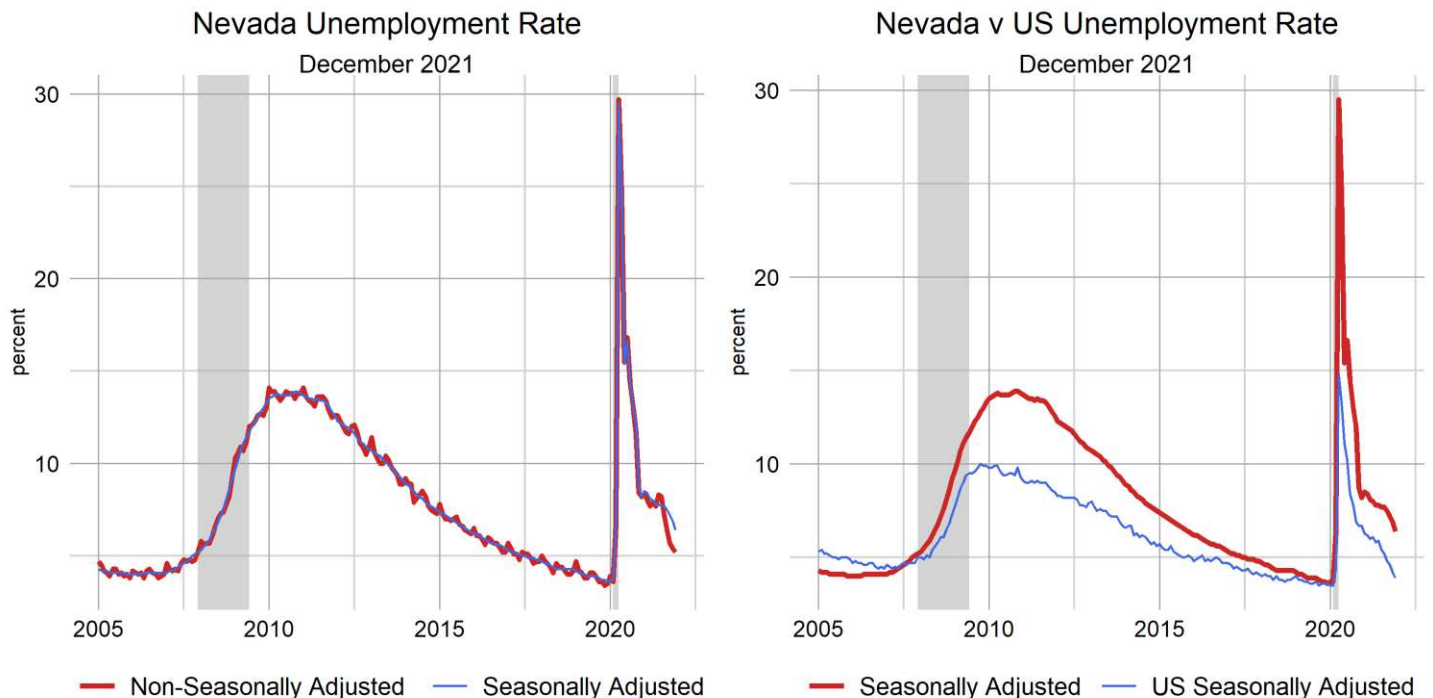

Figures for our unemployment estimates come from the Local Area Unemployment Statistics (LAUS) program sponsored by the ([BLS](#)). Nevada's unemployment rate was 6.4 percent in December, decreased by 0.5 from 6.9 percent in November, and decreased by 1.8 from 8.2 percent in 2020, seasonally adjusted. The number of unemployed individuals decreased by 6,798 from November for a current level of 99,409 people, which is a decrease of 25,215 unemployed people since 2020. The labor force in Nevada is currently 1,546,231 people, which decreased by 3,064 people from November, and increased by 29,834 people since 2020.

Visit our [LAUS page](#) for more information on the labor force in Nevada, or check out our [dashboard](#) for a look at each area.

U.S. & Nevada Local Area Unemployment Statistics December 2021

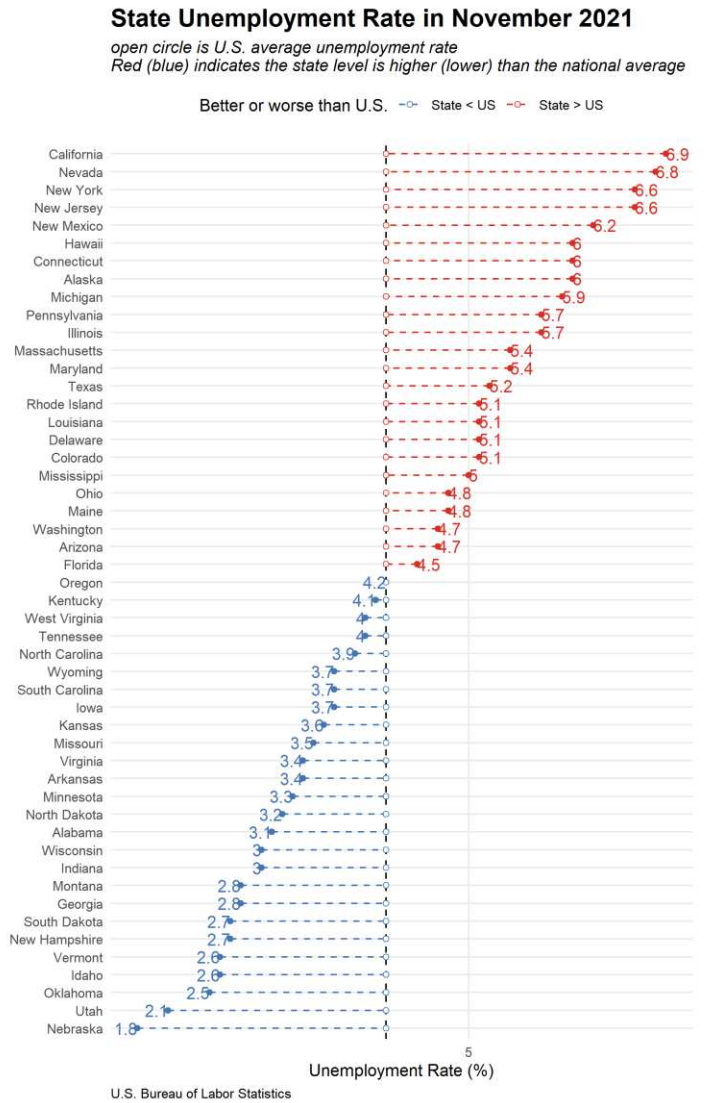

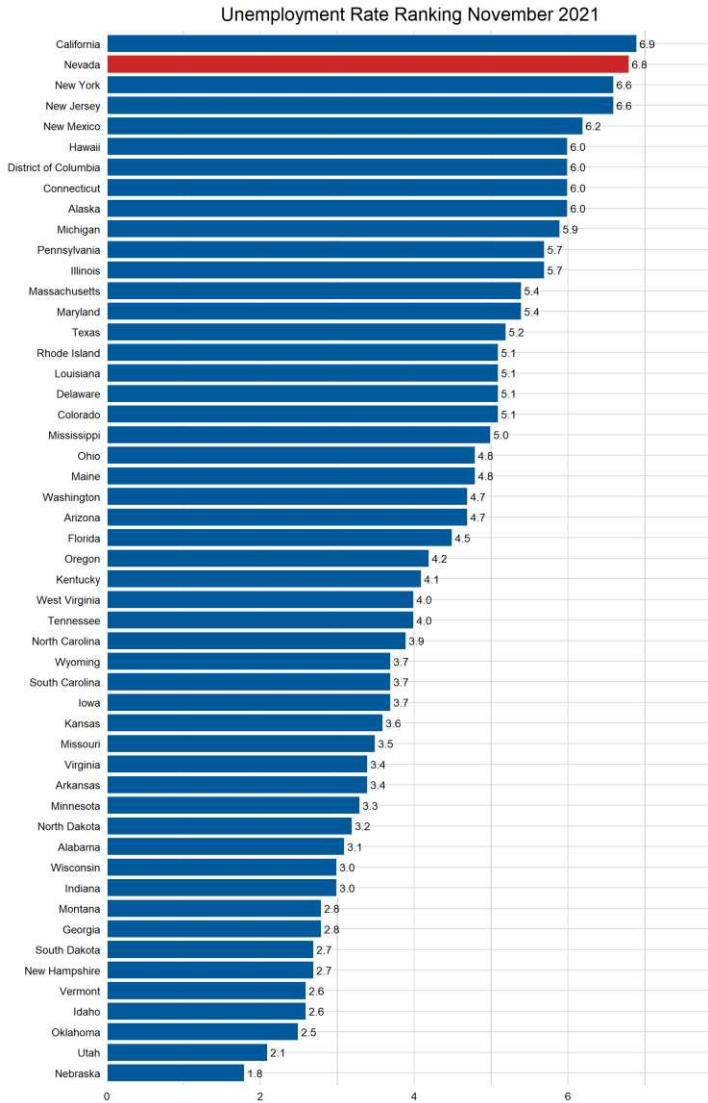

Area	Labor Force	Employed	Unemployed	Unemployment Rate	Labor Force Participation Rate	Employment Population Ratio

Unemployment Rate State Rankings (Prior Month's Data)

According to the Bureau of Labor Statistics, Nevada had the second highest unemployment rate at 6.8 percent, with California having the highest at 6.9 percent and New York at 6.6 percent. Nebraska had the lowest rate at 1.8 percent.

Employment State Rankings (Prior Month's Data)

According to the Bureau of Labor Statistics, Nevada experienced the second largest over-the-year percentage increase at 7.7 percent in non-farm payrolls in November 2021 behind Hawaii which grew the strongest at 8.4 percent. The smallest over-the-year employment increase was seen in Wyoming which grew by 0.7 percent.

Unemployment Insurance

In December, 10,762 initial claims for unemployment insurance were filed in Nevada, an increase of 675 claims, or 6.7 percent, from November when there were 10,087 claims. It's not uncommon to see an increase in claims in December as holiday/seasonal hires are no longer needed. Due to the considerable labor market impacts of the COVID-19 pandemic and the uncertainty that lies ahead, it is hard to be sure if our typical seasonal trends will hold true in 2022. Currently, initial claim totals are on par with pre-pandemic levels, but continued claim levels remain roughly 13,000 higher. Looking forward into 2022, continued claim levels are likely to sustain a steady, yet gradual, declining trend as more individuals in the labor market find work.

State of Nevada Unemployment Insurance Activity

Claims activity for Nevada's regular program saw decreases across all measures in December, a reflection of the decrease in initial claims seen over the previous year. However, claims activity realized mixed results over the month. The number of regular program weeks compensated decreased from November, resulting in \$22.7 million in benefit payments, a decrease of 16.6 percent. First payments were up 11.1 percent over the month, which is likely related to the initial claims increase seen over the month. Final payments, also known as benefit exhaustions, decreased to 2,550, down 17.9 percent from November.

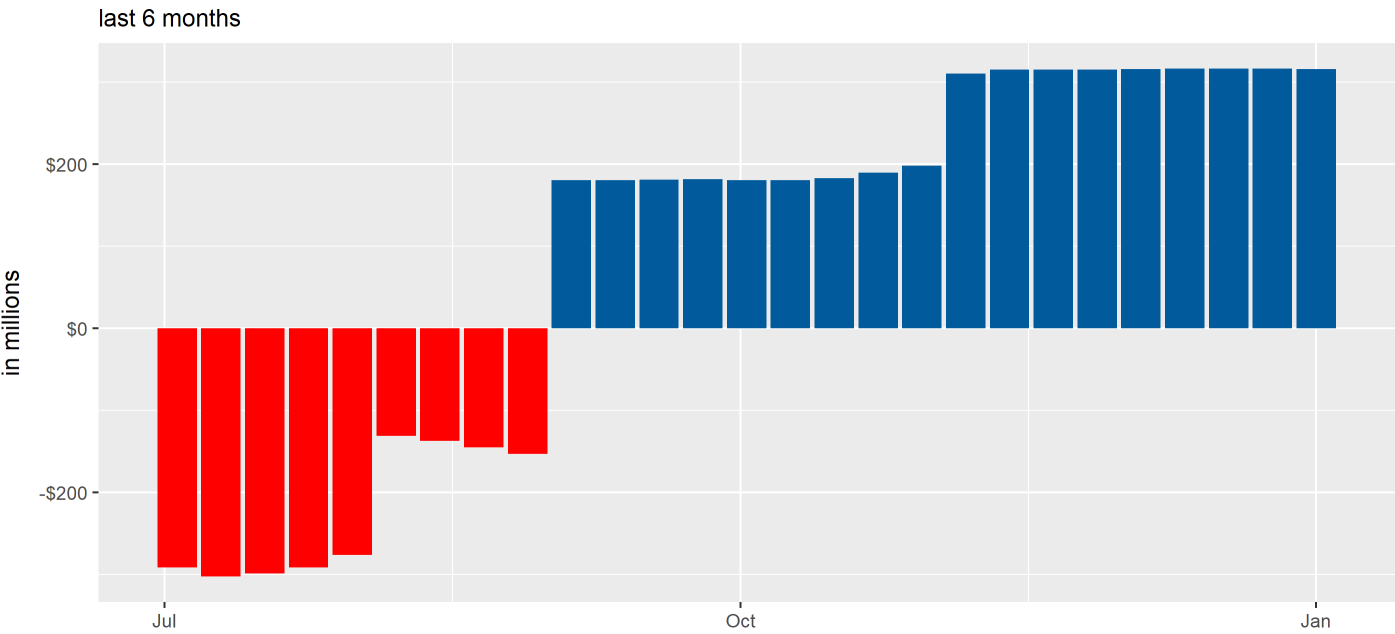

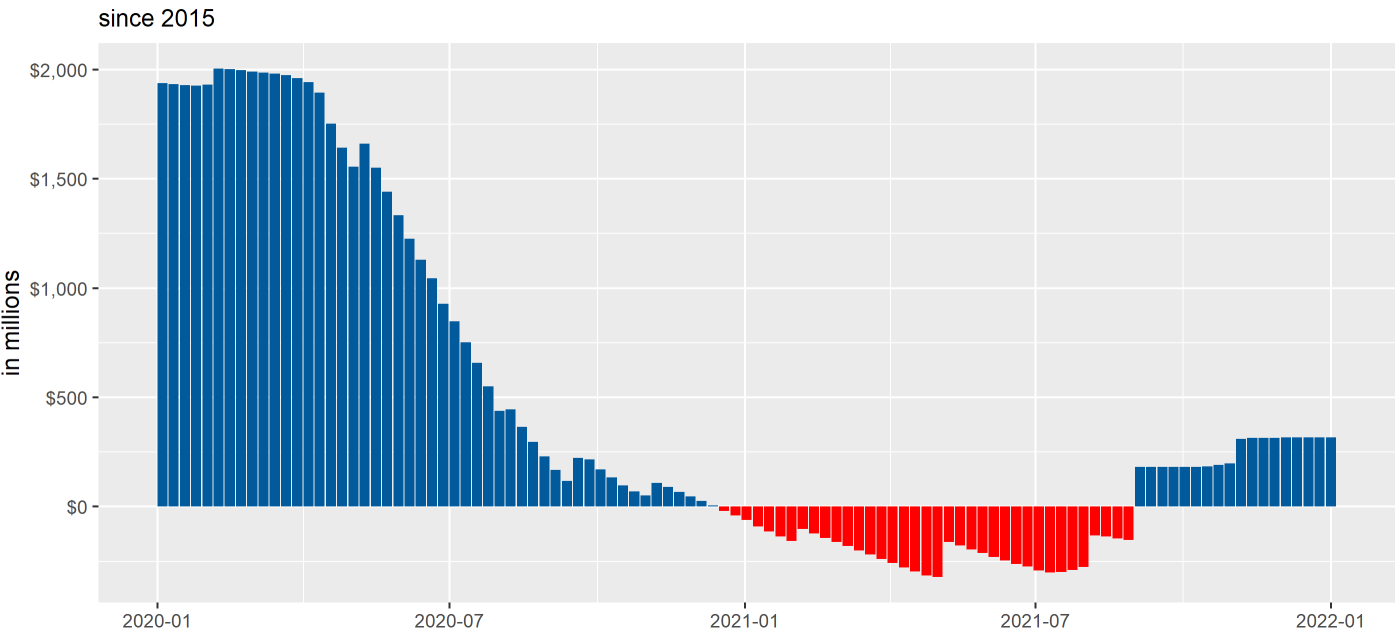

December 2021 Unemployment Insurance Activity

Measure	December 2021	December 2020	% change	November 2021	% change	12 month average
Initial Claims	10,762	37,310	-71.2%	10,087	6.7%	19,818
Weeks Claimed	81,272	319,420	-74.6%	94,000	-13.5%	209,786

Source: ETA 5159

Looking forward into 2022, the Trust Fund currently has a \$316 million positive balance which represents nearly a year's worth of benefit payments if the current monthly benefit payment amount is to remain steady. The current Trust Fund reserve is likely to last to May before the state receives the next large round of contributions from employers. No further borrowing, even on a temporary cash flow basis, will be needed if current claimant trends sustain or continue to decline. If current claim trends hold true, the Trust Fund will likely remain positive through the end of the next year and require no additional borrowing by the state in 2022.

Nevada Unemployment Services Available

DETR serves all Nevada citizens by being the state's lead workforce development agency. DETR consists of divisions that offer workforce related services, job placement and training, services for people with disabilities, investigation of claims of discrimination, unemployment insurance benefits, and labor market data.

For current updates from the department and to find resources available, please visit:

<https://detr.nv.gov/coronavirus>

To file an unemployment insurance claim or for additional information, please visit <http://ui.nv.gov/>

To report unemployment fraud, please visit:

https://detr.nv.gov/Page/Unemployment_Fraud

CES Summary Tables

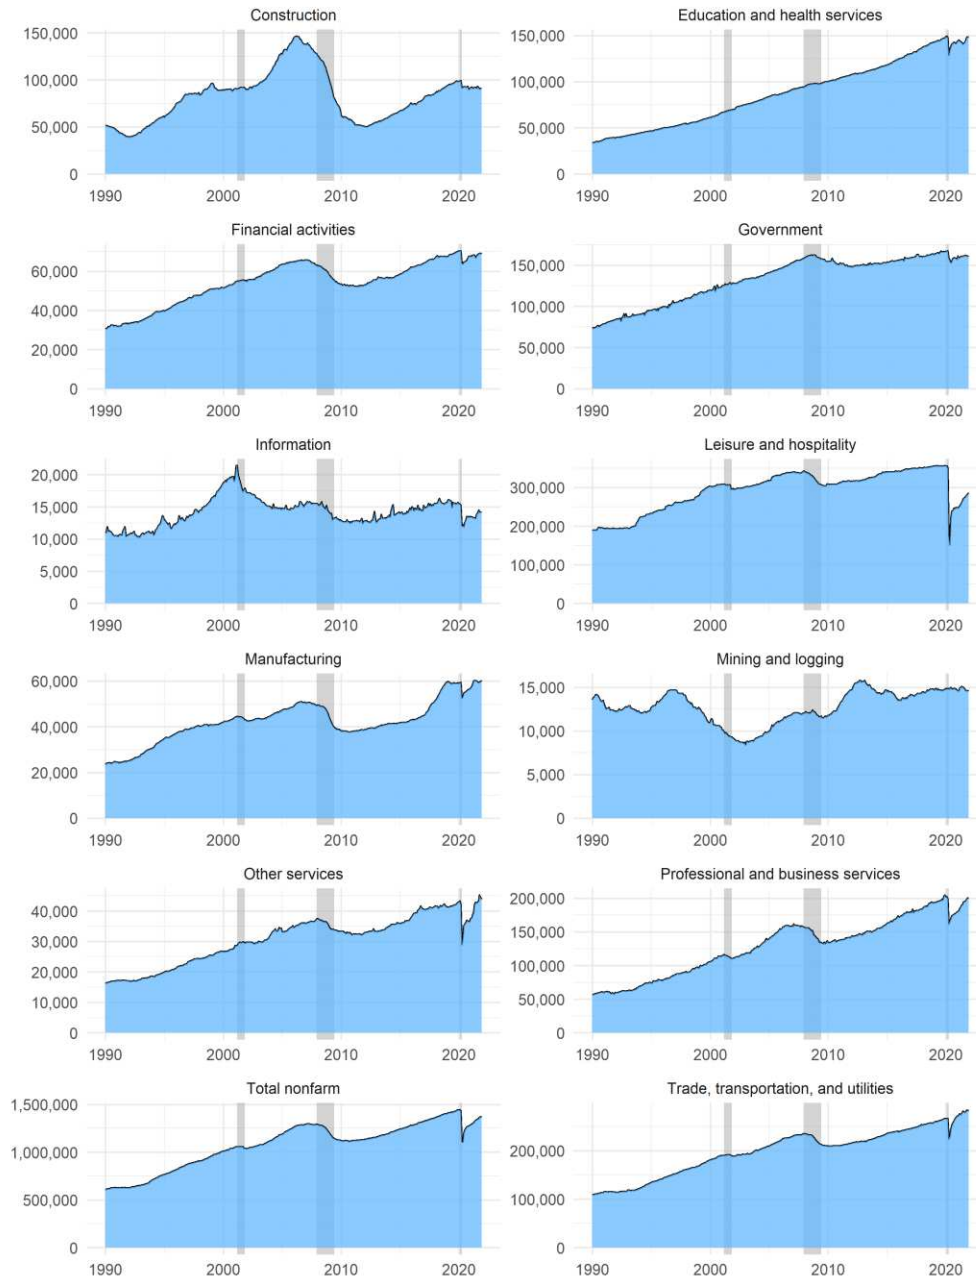

Seasonally adjusted estimates are used to show underlying economic trends by accounting for regularly seen seasonal patterns, and the result is smoother estimates. They are found by taking the difference of the unadjusted estimate and the expected seasonal movement.

STATE & METRO AREA PRESS RELEASE

For Immediate Release
January 21, 2022

Nevada adds jobs in December, Unemployment rate falls

CARSON CITY, NV - According to the Nevada Department of Employment, Training and Rehabilitation's (DETR) December 2021 economic report, Nevada added 3,700 jobs over the month as the state continues to recover from the COVID pandemic. Employment remains below typical levels, but is up 94,700 jobs since December 2020, an annual increase of 7.4 percent. The total employment level in the state is 1,372,200. The state's unemployment rate in December is 6.4 percent, decreased by 0.5 from 6.9 percent in November and decreased by 1.8 percentage points when compared to December 2020.

"I am pleased to see December's employment numbers. The large increase in employment over the year reflects Nevada's ongoing recovery from the COVID recession and the growth in varied industries throughout the state is encouraging. With Nevada continuing to add jobs, and unemployment leveling off, we must remain vigilant as the state continues its recovery from the pandemic and the potential impacts to the economy and labor force," said Governor Steve Sisolak.

- Metropolitan Statistical Area (MSA) Employment (Seasonally Adjusted): Las Vegas employment increased by 6,100 jobs (0.6 percent) since November, an increase of 78,700 jobs (8.7 percent) since December 2020.
- Reno employment had an increase of 1,100 jobs (0.4 percent) since November, an increase of 9,700 jobs (4.0 percent) since December 2020.
- Carson City employment saw no increase of new jobs since November, but still experienced an increase of 1,400 jobs (4.7 percent) since December 2020.

"This report shows a continued rebound in employment growth in Nevada with the state adding 3,700 jobs in December. This growth was spread across many different industries with the leisure and hospitality industry growing the most. The Las Vegas Metropolitan Statistical Area alone added 1,000 jobs in leisure and hospitality. The state's unemployment rate continues to drop, with the seasonally adjusted unemployment rate falling from 6.9 percent in November to 6.4 percent in December and the unadjusted unemployment rate falling from 5.4 percent to 5.2 percent. The state's labor market is continuing its recovery as we emerge from the COVID recession, particularly in the industries that were hit hardest by the pandemic" said David Schmidt, Chief Economist.

Note: Due to data calibration there will not be a data press release in February. The next regular data release will be March 2022.

To see additional labor market data view the department's [employment](#) and [unemployment](#) dashboards located at www.nevadaworkforce.com.
